

## Environmental Objectives

- To ensure use of environmentally friendly products when such are available.
- To ensure hazardous or potentially hazardous materials are always handled and used in accordance with Statutory Requirements, Code of Practice and Manufacturers Instructions.
- Our waste material will only be disposed of through our licensed disposal contractors.
- Wherever possible materials used will be from sustainable resources or recycled material.
- Our vehicles will be fully serviced in accordance with manufacturers recommended procedures by approved vehicle engineers and our journeys will be planned to ensure efficient mileage and use. (It must be recognised that as a service company carrying out work at our clients premises and offering 24-hour emergency cover vehicle use and planning of journeys may not appear efficient). This policy will be reviewed regularly by the management team and updated as necessary.
- The company will ensure that this policy is understood and implemented at all levels within its organisation.
